

DISAB Centurion: High Performance Wet/Dry Materials Handling Unit

DISAB Centurion:

- High performance vacuum tanker that will vacuum dry or wet material
- The DISAB can vacuum material from 200m away and from a tank that is up to 100m deep
- High tip directly into a skip
- Dry material can be placed in bulk bags using the bagging facility at the rear
- A Disab can empty a tank containing grit, screenings and sludge far quicker than a conventional JetVac.

Applications:

- Sludge and primary tank cleaning
- Detention tank cleaning
- Grit detritor cleaning
- Deep wet well cleaning
- Activated sludge lane cleaning
- Anaerobic digestion plant cleaning
- Large culvert cleaning
