

Kaiser Whale: Sewer Cleaning Water Recycler

Kaiser Whale:

- Jets at 410 Litres Per Minute up to 200 Bar and 200m of jetting hose
- Vacuums to depths of around 20m deep
- Water Reuse through on board recycling
- **The recycler can work continuously** as the water removed by the vacuum hose from the sewer is filtered in the recycler's debris tank and pumped back through the jetting hose. **This is compared to a JetVac that has to spend many hours a day filling up it's jetting tank with mains water**

Applications:

- Sewer Cleaning
- Culvert Cleaning
- Highway Drainage Cleaning
- Root Cutting
- Large Diameter Pipe Cleaning

Kaiser Whale sewer cleaning recycler.
